Objective

Aspiring and motivated software engineer passionate about creating innovative, user-centric solutions. Interested in using research-driven methodologies for web applications, data management, and system automation. Eager to collaborate, improve efficiency, and advance technology initiatives.

Education

Bachelor of Technology in Computer Science and Engineering | Adamas University, Kolkata, West Bengal
2022 – Present (Expected 2026) | CGPA: 9.28 / 10

Senior Secondary Education | Kalyani Public School, Barasat, West Bengal
2019 – 2021 | Percentage: 82.60%

Secondary Education | Douglas Memorial Higher Secondary School, Barrackpore, West Bengal
2013 – 2019 | Percentage: 90%

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), Tailwind CSS

Backend: Laravel, Flask, Node.js, Express.js, REST APIs.

Databases: MySQL, MongoDB.

Languages: Python, PHP, Java, JavaScript (Intermediate), C, SQL.

DevOps & Tools: Docker, Google Cloud Console, Git, GitHub, VS Code.

Additional: Authentication (Manual & Google OAuth), Image Processing, DICOM Handling, API Integration, Performance Optimization, Web Scraping.

Experience

Software Development Intern – Department of CSE, Adamas University

May 2025 – Present

- Built a **PhD Progress Tracker System** to manage **doctoral students' milestones**, automating progress notifications.
- Developed **PBAS (Performance-Based Appraisal System)** to streamline faculty evaluation, reducing manual work.
- Implemented **role-based access control and interactive dashboards**, improving usability for **faculty members**.

Cybersecurity Research Intern – University College Cork (UCC), Ireland

June 2025 – September 2025

- Developed a **Flask web application** for medical image decoding and secure data handling.
- Implemented **AES & RSA encryption/decryption algorithms** to protect sensitive patient data.
- Simulated **third-party access scenarios** to identify security vulnerabilities, improving data protection coverage.

Software Development Intern – KATSI Canada, Toronto

Aug 2024 – Apr 2025

- Co-developed an **OFAC List Checking Web App** using PHP & MySQL, improving compliance checking speed.
- Created **SRS and system diagrams** using Visual Paradigm and Figma for accurate project planning.
- Conducted **manual test cases** to ensure zero critical bugs and deployed the website on **AWS/Hostinger**.

Junior Research Collaborator – The Future Network, Kolkata

Sep 2023 – Apr 2024

- Built **backend scripts in PHP** to store real-time eye-tracking data into MySQL for **research analysis**.
- Developed **frontend dashboard** using HTML & PHP, enabling visualization of **tracking data for experiments**.

Projects

Student Portal – Full-Stack Web Application

- Developed a student information system in **PHP + Tailwind CSS + MySQL**, used by **1,500+ students**.
- Created **Admin Dashboard** for **25+ faculty members** to edit students' data, approve or decline student.
- Implemented **secure authentication, real-time updates**, and **responsive design** across desktop & mobile.

Performance-Based Appraisal System (PBAS)

- Automated **faculty appraisal processes**, reducing manual evaluation time.
- Integrated **email notifications, role-based access**, and **dynamic reporting dashboards**.

PhD Progress Tracker

- Tracked milestones for **doctoral students** with **interactive dashboards** and automated notifications.
- Enabled supervisors to monitor academic progress and generate performance reports efficiently.

Certifications

- **Introduction to Algorithms and Analysis** – NPTEL
- **Problem Solving Through Programming in C** – NPTEL
- **The Joy of Computing Using Python** - NPTEL
- **Understanding Google Cloud Security and Operations** - Google
- **Introduction to Large Language Models** - Google
- **Programming with Python** – upGrad.
- **Artificial Intelligence in Real World** – upGrad.
